

MAPPING JUSTICE

A virtual summer course for high school students from the Gulf Coast

STEM Education + Climate Justice

Learn

How to collect, analyze, and communicate data for climate action

Build

Interactive maps and a capstone project about environmental and social problems

Connect

With peers and community organizations with aligned missions

FRAMEWORK

Our educational framework is designed to empower youth to address issues impacting their communities through project-based, civic learning

Curiosity

Imagine a climate-just society

Analysis

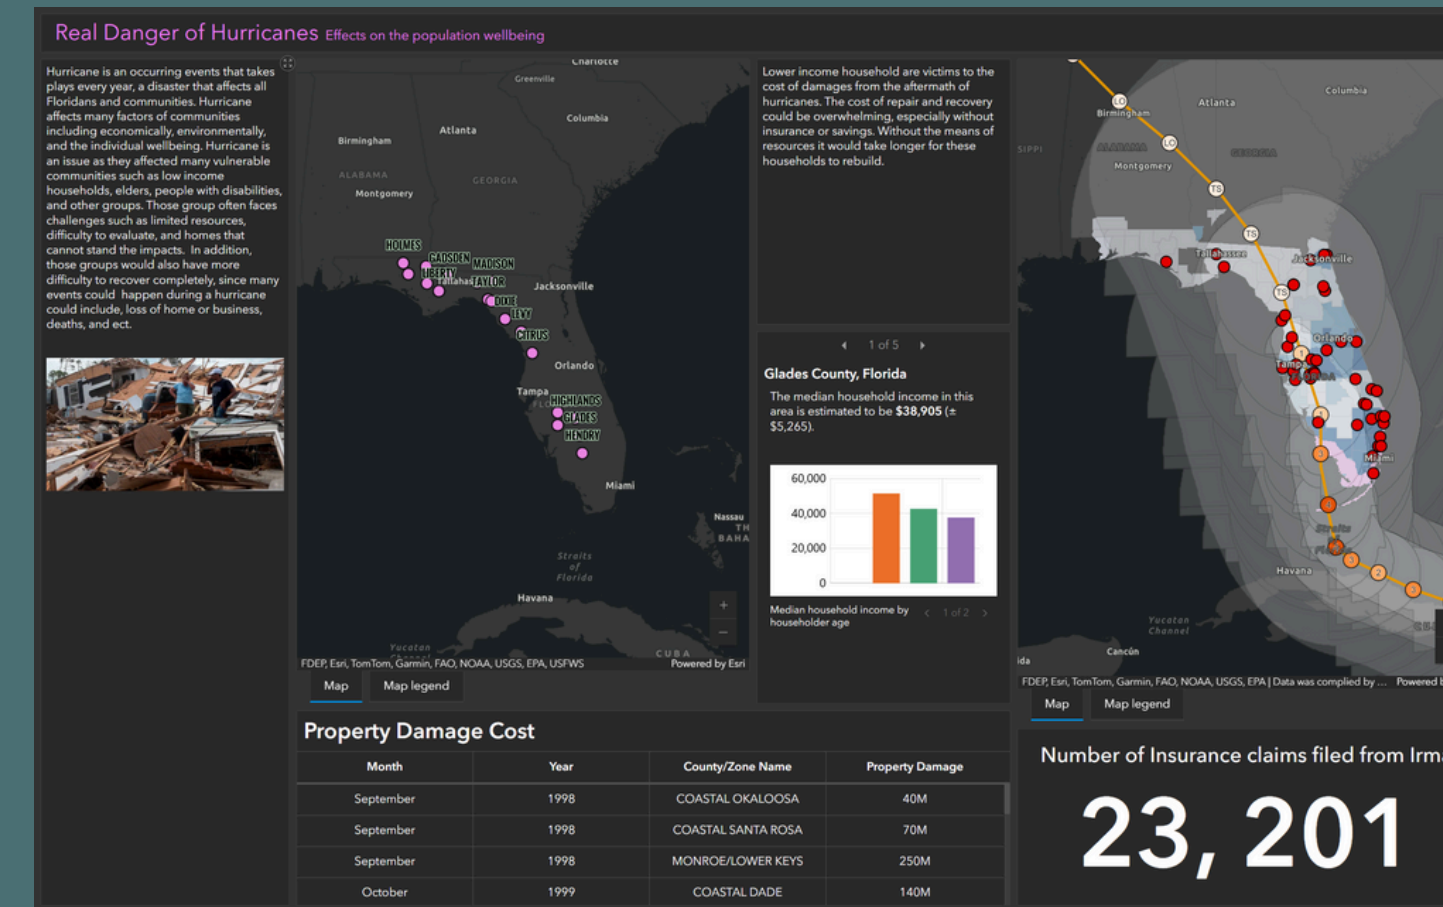

Explore drivers of social inequity

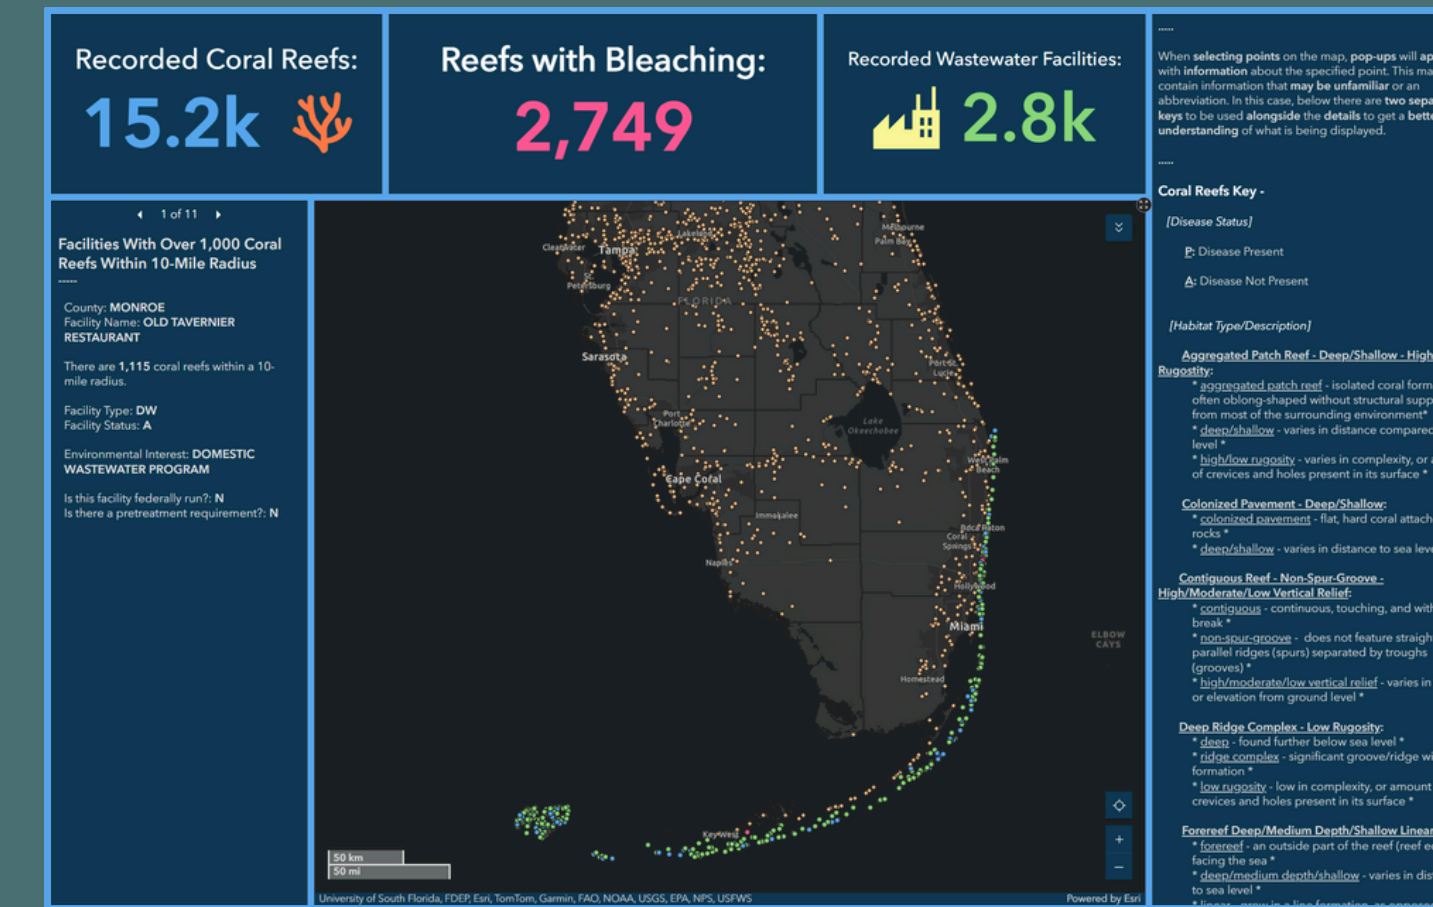

Innovation

Design geospatial tools to direct change

STUDENT PROJECTS

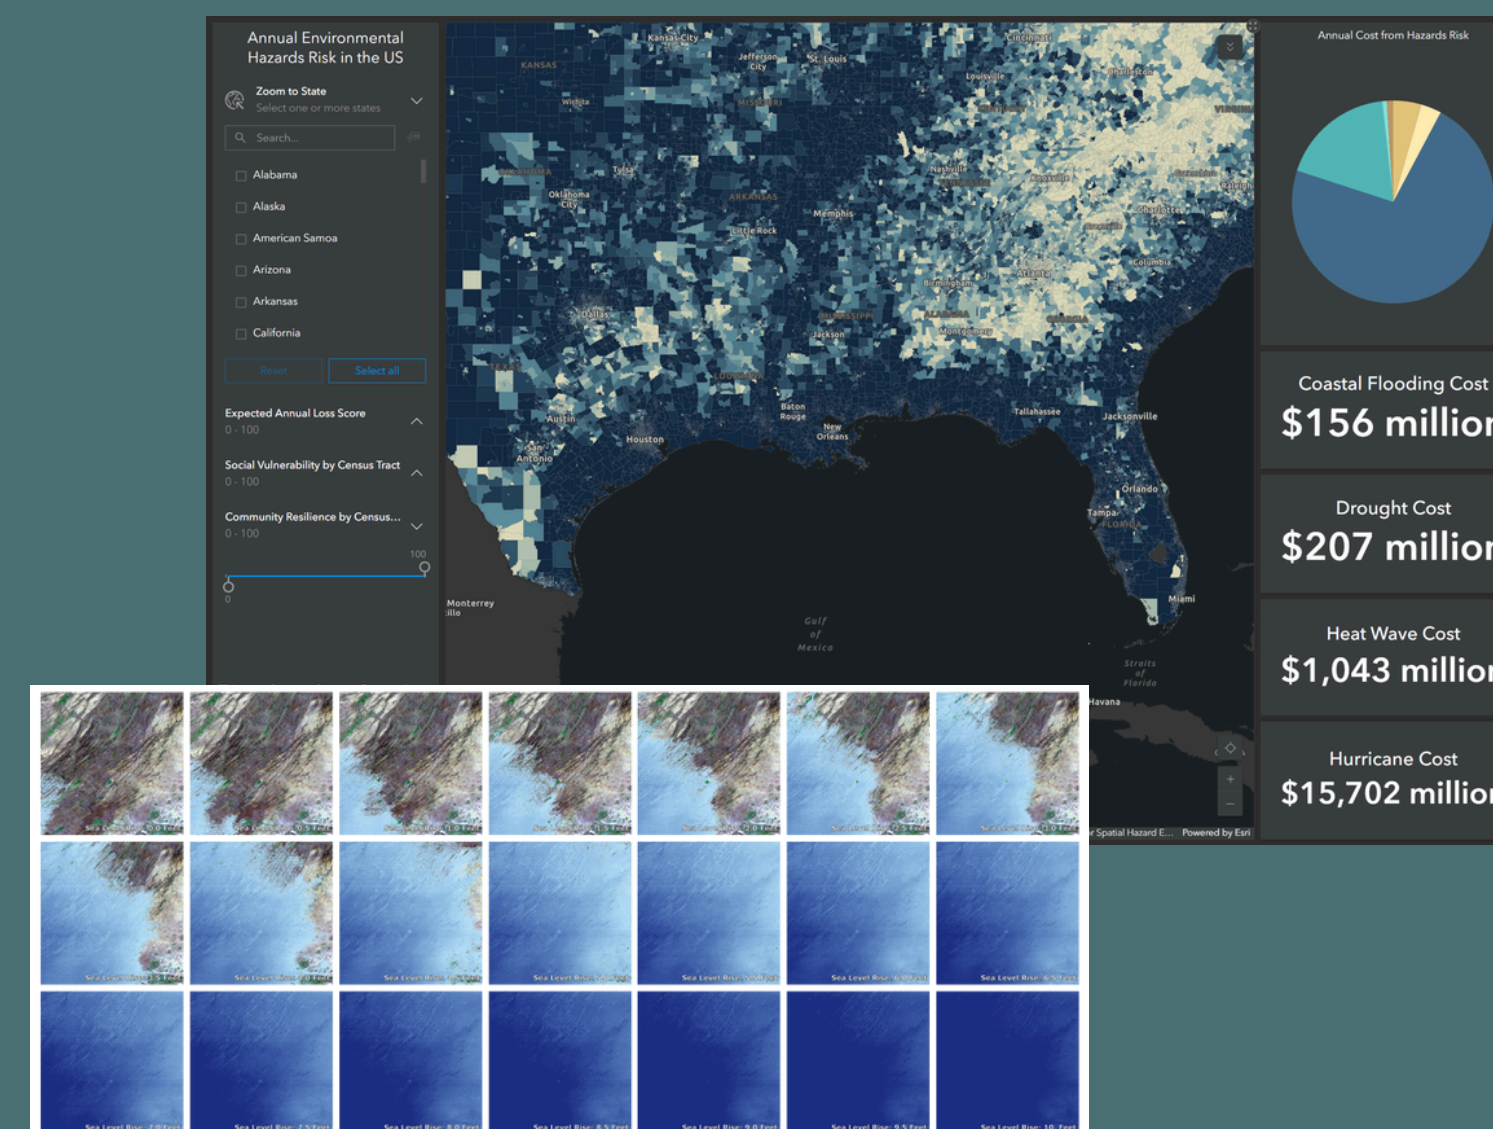

How are hurricanes impacting Florida? Capstone project by Anna, Dominic, and Angel (Florida, 2024)

How can we stop the coral bleaching crisis? Capstone project by Amber (Florida, 2023)

GIS for Climate Action

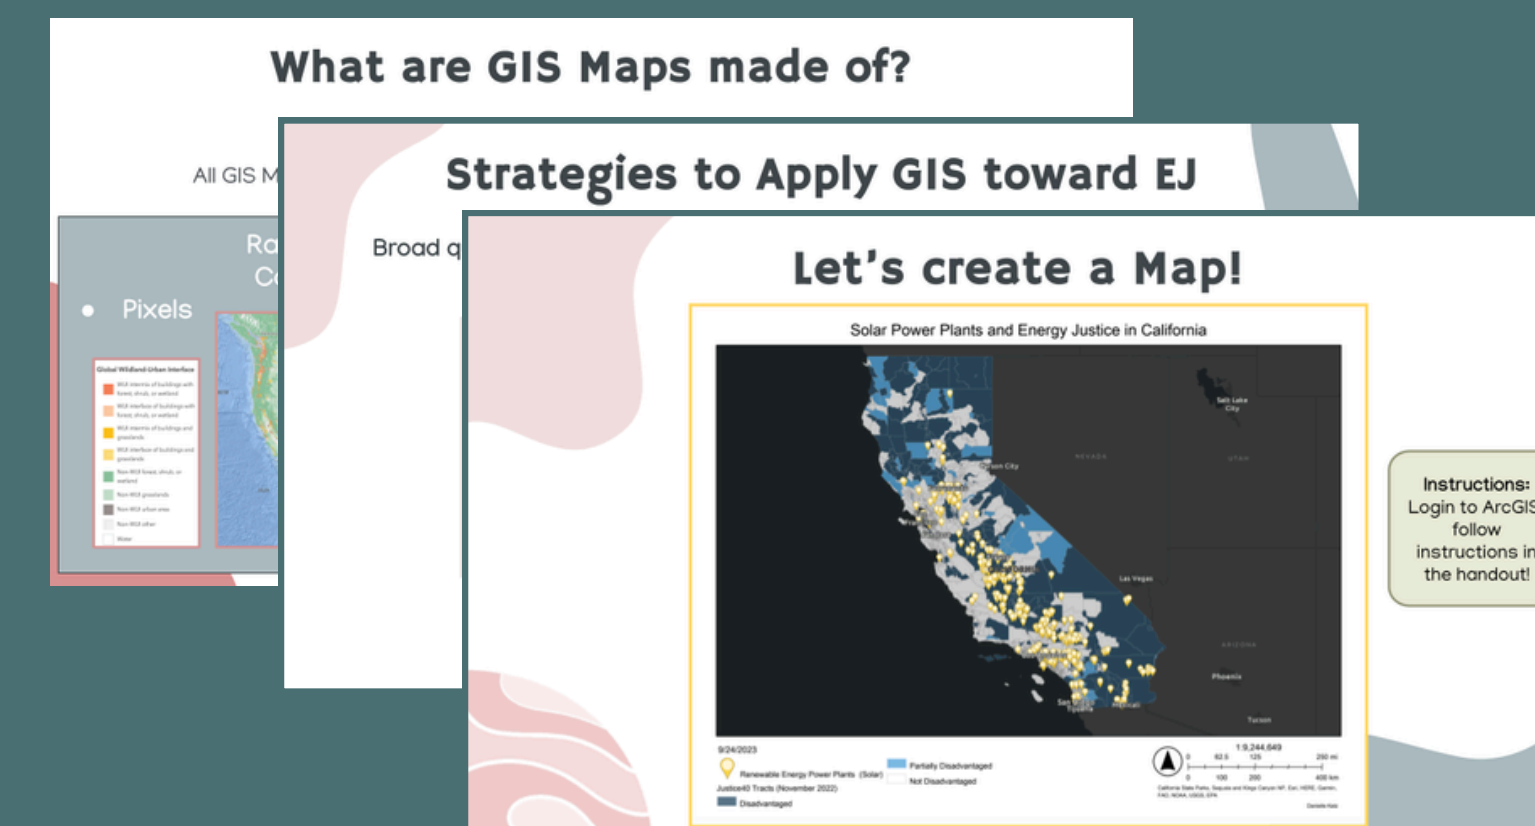

We can use geographic information systems (GIS) to visualize climate change impacts, sea level rise, deforestation, spatial inequities, and more

trubel&co is a tech-justice nonprofit championing youth to tackle complex societal problems using data, design, and technology

trubel&co Workshops

EcoGIS: An Environmental Justice + GIS workshop series

In addition to Mapping Justice, trubel&co hosts workshops to teach youth how to apply GIS for environmental justice

Outreach Kit

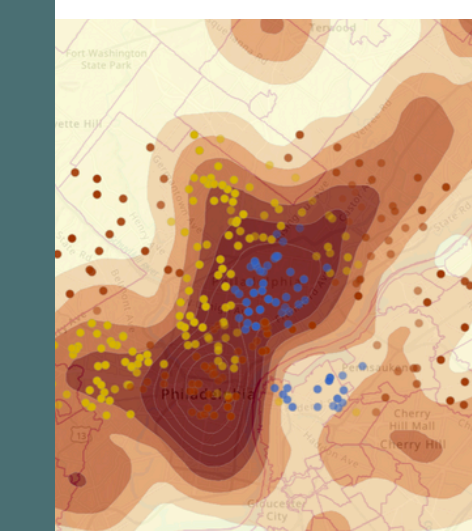

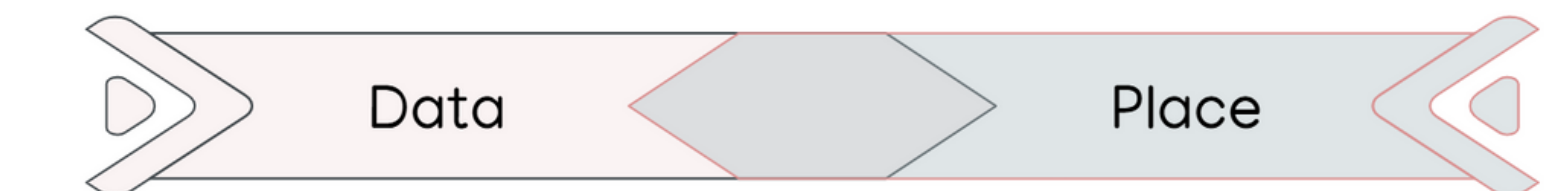

trubel.co/m-j

TEACHING

[GIS] Geographic Information Systems

Good maps convey data, but great maps tell stories

"GIS lets you see how geography, socioeconomic, and environmental issues intersect."

- Mapping Justice Student

STUDENT QUOTES

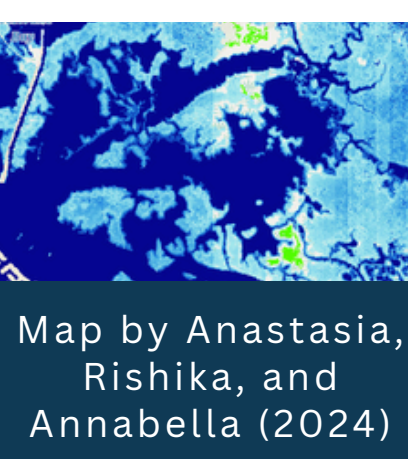

"This course provided an opportunity to create change in my community. It made me think about what I want to do about climate injustices now."

"This course will flip your relationship with maps upside down... it helps begin your journey as an activist, data scientist, or whatever changemaker you wish to be."

"Through Mapping Justice, I got to learn how I could use my technological skills to also fight climate injustice issues."

"Mapping Justice was an opportunity to explore the things that were important to me, especially the things that impact my community."
